

The Office of Astronomy for Development (OAD) is a global office that is mandated to use astronomy, including its practitioners, skills and infrastructures, to drive positive developmental change.

Our vision is “Astronomy for a better world“, with the 17 United Nations Sustainable Development Goals (SDG) as broad objectives for global development.

Astronomical Observatory

Every year, the OAD conducts a Call for Proposals, in which individuals and organisations anywhere in the world are invited to propose projects that use Astronomy to address a problem or challenge related to development. Since 2013, the OAD has funded more than 120 projects around the world. For more details on the Annual Call for Proposals, please visit www.astro4dev.org/cfp.
